

Tualatin Basin Public Awareness Committee Annual Report July 2009 – June 2010

The Tualatin Basin Public Awareness Committee (TBPAC) is a group of dedicated individuals with the single goal of protecting the Tualatin River Watershed through innovative stormwater public awareness and education activities. The TBPAC “Partners for Clean Water” have met since 1993 to leverage resources to deliver healthy watershed programs at little or no cost to Tualatin Basin residents. The Fiscal Year 2010 participants included:

Sponsors

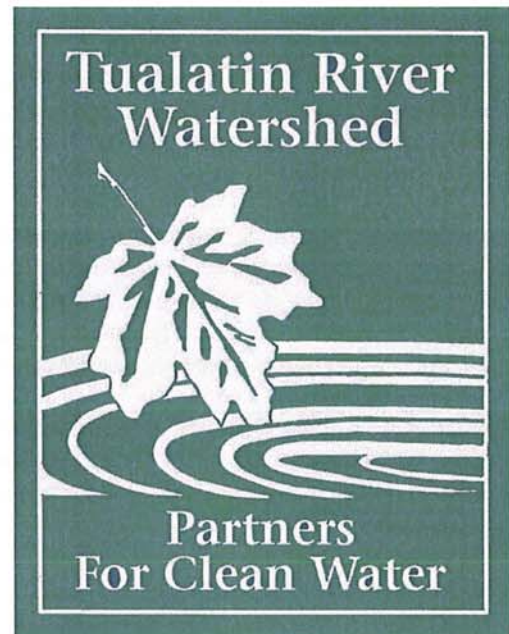

Jennifer Devlin, Portland Bureau of Environmental Services
David Gilbey, City of Lake Oswego
Shaun Rohret, City of West Linn
Carla Staedter, City of Tigard
Victoria Saager, Washington County Operations & Maintenance
Joan Andersen-Wells, Tualatin Hills Park & Recreation District
Amy Kyle, Clackamas County Water Environment Services
Ely Teragli, Clean Water Services
Karen DeBaker, Clean Water Services

In-Kind Partners

April Olbrich, Tualatin River Watershed Council
Brian Wegener, Tualatin Riverkeepers
Emily McBride, Raindrops to Refuge

Designated Management Agency Group

Sheila Ault, OR Department of Agriculture
Amin Wahab, City of Portland BES
Frank Wildniese, City of Portland BES
David Gilbey, City of Lake Oswego
Roy Iwai, Multnomah County
Shaun Rohret, City of West Linn
John Nagy, Clackamas County WES
Andrew Swanson, Clackamas County WES
Greg Clemmons, Washington County
Rick Raetz, Washington County
Donna Hempstead, Washington County
Dennis Ades, DEQ
Jan Miller, Clean Water Services
Raj Kapur, Clean Water Services
Charles Logue, Clean Water Services
Jerry Linder, Clean Water Services

Sponsored Programs (\$9182.23)

Naturescaping for Clean Rivers Workshops (\$4656.23)

The Partners sponsored four Naturescaping and one Rain Garden workshop in the Tualatin Basin. Attendees learned how to landscape and garden with native plants, using less water and fewer chemicals to protect water quality and enhance habitat. Demand steadily increases in the Basin and the Partners plan to continue offering the classes each year. Past attendees were surveyed on the effectiveness of the program (see attached).

Registered	Attended			
45	37	November 7	Natures aping Basics	Tigard
23	20	December 5	Site Planning I	Tigard
51	39	February 21	Naturescaping Basics	Beaverton (Nature Park)
30	22	March 13	Site Planning I	Beaverton (Nature Park)
31	29	May 8	Rain Garden 101	Sherwood

Canines for Clean Water (no cost)

The Partners launched the Canines for Clean Water campaign in May 2007. This fiscal year, 115 dogs and their owners pledged their commitment to keeping our rivers clean. Thirty-five pledged via the website and 80 combined from dog park events and at their veterinary clinics. The Bonnie Hayes Animal Shelter continues to include pledge cards and baggies in their kits for new dog owners. www.cleanwaterservices.org/canines

Stream-friendly Home & Yard Care Brochure Reprint (no cost)

Members revised the popular brochure originally created in the mid-90s and reformatted it as a printable PDF document. Members can print the new "Nature-Friendly Home & Yard Brochure" for their own distribution as needed which saves time, money and even trees. Healthy watershed tips such as roof treatments, car washing and composting have been updated along with natural recipes for insect control, weed removal and garden soil amendment.

Will Hornyak "Living Stream" presentations (\$3000)

Storyteller Will Hornyak presented 10 "Living Streams" presentations to 1850 students and 74 teachers in the Tualatin Basin this year. The assembly program with its message of "taking action to care for local watersheds" was offered twice at each school.

November 23	Forest Park Elementary	Lake Oswego
December 18	Five Oaks Middle School	Beaverton
February 2	North Plains Elementary	North Plains
April 9	Five Oaks Middle School	Beaverton
May 10	Echo Shaw Elementary	Cornelius

Student Watershed Research Project Sponsorship (\$1400)

For the first time, the Partners help sponsor and judge the 2010 Student Watershed Research Project (SWRP) program in which Tualatin Basin schools participated. SWRP is a self-support program of Portland State University's Environmental Science and Management Department, uses the cooperation of teachers, students, scientists, businesses, governmental agencies, and community groups to couple watershed education with the collection of high quality data. It is the mission of SWRP to develop awareness, knowledge, skills, and commitment leading to responsible behavior and constructive actions with regard to water quality and watershed resources.

Bus Funding for Watershed Field Trips (\$126)

This year, the Partners saw a need for bus funding for students to leave the classroom and visit stream sites to do water quality testing. Since most or all of the bus funding programs have been cut throughout all basin-wide schools, the funding is welcomed by teachers wholeheartedly. Two of Westview High School's science classes visited Commonwealth Park and Johnson Creek, respectively.

Income July 2009-June 2010

Since taking a Naturescaping workshop have you planted any native plants?

Number	Response Date	Please elaborate
1	Jan 21, 2010 12:12 AM	I planted one Oregon Grape!
2	Jan 21, 2010 1:53 AM	Yes, we have planted a lot of native plants near our creek and in our yard.
3	Jan 21, 2010 2:30 AM	Yes, oregon grape, vine maple
4	Jan 21, 2010 8:58 AM	Planted columbine, oregon iris, mock orange
5	Jan 21, 2010 4:44 PM	removed 50% of my front lawn and plant over 45 native plants
6	Jan 24, 2010 7:00 PM	I have not been able to plant this winter, however I have decided where to put plants in my yard
7	Jan 25, 2010 4:51 PM	Added ferns, ribes sanguineum, elderberry bushes
8	Jan 25, 2010 9:10 PM	Yes, at my mom's house (I live in a condo.) Pacific Ninebark and douglas spirea in her backyard
9	Jan 27, 2010 3:30 PM	currants, huckleberries, salal, kinnikinnik, elderberry, dogwoods
10	Jan 28, 2010 2:34 AM	I have plant in pots that I plan on planting outdoors once temperatures warm up
11	Feb 5, 2010 3:48 PM	Laid out some of the plants, oregon grape, vine maple, and evergreen huckleberry

Naturescaping

Since attending the Naturescaping workshop have you tried an organic fertilizer or pest control product?

Answer Options	Response Percent	Response Count
No	76.9%	10
Yes	23.1%	3

Since attending the Naturescaping workshop have you tried an organic fertilizer or pest control product?

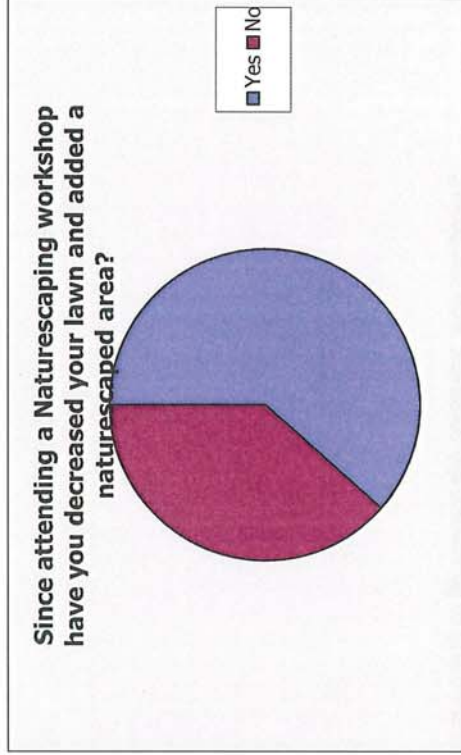

■ No ■ Yes

Number	Response Date	Please elaborate
1	Jan 21, 2010 8:58 AM	Have not needed to
2	Jan 21, 2010 4:44 PM	switched to organic fertilizers completely and tried organic means of killing slugs
3	Jan 24, 2010 7:00 PM	For over a decade I have always picked weeds by hand. My mother in law introduced me to Alaskan Fish Fertilizer about eight years ago, I it does wonders.
4	Jan 25, 2010 4:51 PM	Have always used the organic fertilizer and recently used the gluten meal for emerging weed contro
5	Jan 25, 2010 9:10 PM	I'm not sure my mom's fertilized at all.
6	Jan 27, 2010 3:30 PM	compost
7	Feb 5, 2010 3:48 PM	I swaped my garden out, and I am trying to go without any additives. I do composting

Naturescaping

Since attending a Naturescaping workshop have you decreased your lawn and added a naturescaped area?

Answer Options	Response Percent	Response Count
Yes	61.5%	8
No	38.5%	5
Please elaborate		9
		answered question 13
		skipped question 0

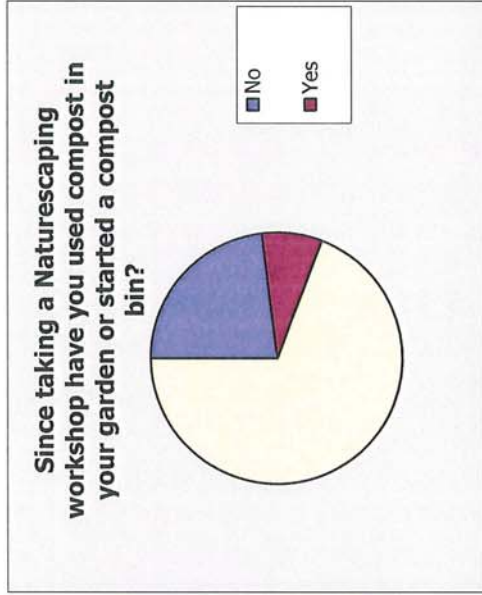

Number	Response Date	Please elaborate
--------	---------------	------------------

- 1 Jan 21, 2010 12:12 AM** Removed about 6 square feet of lawn and added a pathway, but no extra plants.
- 2 Jan 21, 2010 1:53 AM** We are eliminating nearly all of the grass in the front of our house and replacing with naturescaped area and paths.
- 3 Jan 21, 2010 2:30 AM** small area of fern garden. intend to get rid of all the lawn eventually.
- 4 Jan 21, 2010 8:58 AM** Unfortunately with the heat wave last summer our lawn died, because we're trying to take the naturescaping slowly we've only replaced a small section so far. It's not pretty yet, but the naturescaped area is weed-free, low-maintenance and we're feeling hopeful about what we can do this spring and summer.
- 5 Jan 21, 2010 4:44 PM** see above
- 6 Jan 24, 2010 7:00 PM** I have an area that will be planted in the spring/summer and I have just let it go to see what comes up also. Last year I had a giant stalk plant grow and it flowered yellow. It was gorgeous, then I found out in the class it was a weed. I hope more grow back, because they are native, I did nothing for it to thrive, and it is very colorful.
- 7 Jan 25, 2010 9:10 PM** Not yet. The workshop recommended working in small, manageable areas and what we covered last year was just weeds. This year we plan on taking out a 10' X 40' area of grass--using the newspaper method.
- 8 Jan 27, 2010 3:30 PM** removed about 8 sq feet of front lawn for tree and shrub
- 9 Feb 5, 2010 3:48 PM** The plan before going was to convert over 50% of lawn to beds that I can maintain at 55+ in years. I have started that process, finding natural plants, and items (old tea pots, vases, etc) to add character. It will be a long process as I do this when I have time.

Naturescaping

Since taking a Naturescaping workshop have you used compost in your garden or started a compost bin?

Answer Options	Response Percent	Response Count
No	23.1%	3
Yes	7.7%	1
Already had one	69.2%	9
Please elaborate		5
answered question		13
skipped question		0

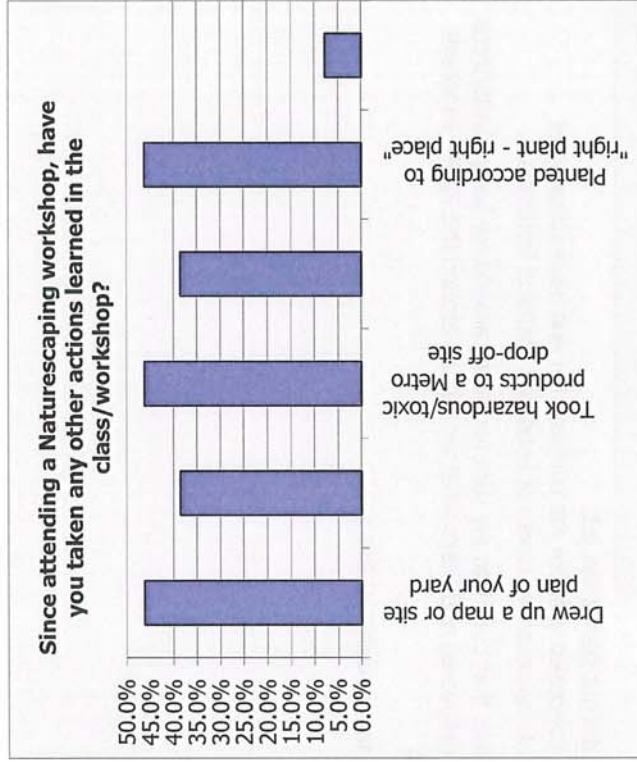

Number	Response Date	Please elaborate
1	Jan 21, 2010 12:12 AM	Used compost, but did not start a bin yet.
2	Jan 21, 2010 8:58 AM	We want to build a concealed area for the compost bin and have some other projects to finish first. However we have not used any chemical fertilizers.
3	Jan 24, 2010 7:00 PM	I did start using leaves that blew into my yard for mulch around my baby plants/trees.
4	Jan 25, 2010 9:10 PM	Mom had compost delievered and that's what we spread around the Pacific Ninebark and Douglas Spirea.
5	Jan 27, 2010 3:30 PM	I am trying to heat up my compost this year.

Naturescaping

Since attending a Naturescaping workshop, have you taken any other actions learned in the class/workshop?

Answer Options	Response Percent	Response Count
Drew up a map or site plan of your yard	46.2%	6
Removed invasive plants	38.5%	5
Took hazardous/toxic products to a Planted a tree	46.2%	6
Planted according to "right plant - right Use a timer and drip irrigation to water	38.5%	5
Other (please specify)	46.2%	6
	7.7%	1
