preventive services

Preventive services coverage

Kaiser Foundation Health Plan of the Northwest has always offered broad, affordable coverage options that encourage members to seek care before a health condition becomes serious. And we remain committed to improving the long-term health of our members. Beginning with the first plan year on or after September 23, 2010, and in compliance with the Patient Protection and Affordable Care Act, we're eliminating member cost share for certain preventive services on some plans, including:

- All new and renewing individual and family plans, except those with grandfathered status
- All new and renewing small group plans
- All large group plans other than grandfathered plans and retiree-only plans
- All grandfathered and retiree-only large group plans that choose to add the preventive services package

In this document, you'll find a summary of the federal requirements for preventive services followed by a list of additional preventive services for Oregon and Washington.

Your guide to preventive services under health care reform

The required preventive services are based on recommendations by the United States Preventive Services Task Force, the Health Resources and Services Administration, and the Centers for Disease Control and Prevention. For many plans, we're bundling those services into a national package with no cost sharing for members. Additional services are mandated in some states. We'll cover all federal- and state-mandated benefits as required by law.

Health care reform update

preventive services

- **Immunizations** for children from birth to 18 years (doses, recommended ages, and recommended populations vary):
 - Diphtheria, tetanus, pertussis
 - Haemophilus influenzae type B
 - Hepatitis A
 - Hepatitis B
 - Human papillomavirus
 - Inactivated poliovirus
 - Influenza
 - Measles, mumps, rubella
 - Meningococcal
 - Pneumococcal
 - Rotavirus
 - Varicella

Additionally, we will continue to cover the physical maintenance examination at no member cost share for all groups adding our preventive care package.

State-mandated services

This list includes information about the state-mandated services that are in addition to those required by federal health care reform. We'll continue to provide those services as part of our preventive services package.

Oregon and Washington

- Prostate cancer screenings (e.g., prostate-specific antigen testing and digital rectal examination)
- Scheduled prenatal visits and first postpartum visit

Additional information about preventive services

Preventive vs. diagnostic or therapeutic services

There are some additional things to keep in mind about coverage for preventive services vs. coverage for diagnostic or therapeutic services:

- When both preventive services and diagnostic or therapeutic services occur at the same visit, members will pay a cost share for the diagnostic or therapeutic services but not for the preventive services.
- When a preventive service turns into a diagnostic or therapeutic service in the same visit, the diagnostic or therapeutic cost share will apply.
- Deductibles, copayments, and coinsurance may also apply to other preventive services that are covered by Kaiser Foundation Health Plan of the Northwest but are not part of the new law.
- The services listed in this document may be subject to age and frequency guidelines, and may be subject to cost share outside of these guidelines.

Medical necessity

A Kaiser Permanente health professional will determine if services are medically necessary for each member. A service is considered medically necessary if it's medically required to prevent, diagnose, or treat a member's condition or clinical symptoms and it's consistent with generally accepted professional standards of care in the medical community.

For more information

Please see the *Evidence of Coverage* for details about how the preventive services mandate applies to your plan, or contact your Sales Executive or Account Manager for more information.
