Position Title: Journey HVAC Technician/Commercial Service Technician – Construction Department
(If possible, complete separate forms for each position)

Jobsite Location: Various in the Portland metro and surrounding region.

Brief Description Of The Company: Designs, builds and services commercial and industrial heating, ventilations and air conditioning systems. We are equipped to design, budget, construct and manage projects of all sizes and types. We're committed to building strong teams and lasting relationships. That's why we've been around since 1974. Our reputation in the Northwest has helped us become a trusted partner and an established industry leader.

Job Responsibilities/Description of Position:

1. Building controls, start-up and commissioning.
2. Will work directly with clients, managing engineer consultants, and staff.

The preferred candidate will have excellent technical skills and outstanding communication and interpersonal skills. This person must have the ability to work in a fast paced environment and must also possess a high degree of integrity and the ability to analyze a variety of problems and work independently. This position requires mature judgment and initiative. Time management and organizational skills are also essential.

Qualifications:

- Minimum of 5 years of commercial HVAC experience is required.
- Experience with project organization, crew efficiency and quality control is required.
- Superior installation and diagnostic skills are a must.
- Knowledge of VAV systems is required.
- Experience with building controls/Direct Digital Controls is a plus.
- Experience with hydronic systems including pumps and chillers is a plus.
- Familiarity with LEED construction practices and commissioning is a plus.
- CFC card and LEB license is required.
- A valid driver's license and drug screening is required.

Ideal candidate would also have Limited Energy Tech. License but this is not required.
